```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Database :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

OM protein - protein search, using sw model

Run on: June 18, 2004, 17:30:33 ; Search time 18 Seconds (without alignments) 1090.580 Million cell updates/sec

Title: Perfect score: Sequence: US-10-069-772-2
2047
1 MGAGGRMSDPSEGKNILERV.....IYIEPDEDSEHKGVFWYHKM 377

Scoring table: BLOSUM62 Gapop 10.0 , Gapext 0.5

Searched: 141681 segs, 52070155 residues

Total number of hits satisfying chosen parameters: 141681

Minimum DB seq length: 0
Maximum DB seq length: 200000000

Post-processing: Minimum Match 0%
Maximum Match 100%
Listing first 45 summaries

Database :

SwissProt_42:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

RY "Developmental and growth temperature regulation of two different microsomal omega-6 desaturase genes in soybeans.";

RI microsomal omega-6 desaturase genes in soybeans.";

RL Plant Physiol. 110:311-319(1996).

CC -!- FUNCTION: ER (microsomal) omega-6 fatty acid desaturase introduces continued to the second double bond in the biosynthesis of 18:3 fatty acids, conjugate to constituents of plant membranes. It is thought to use conjugate to generate to phosphatidylcholine and to act on fatty acids conjugate to phosphatidide.

CC -- Esterified to phosphatidylcholine and, possibly, other phospholipids.

CC -- PATHMAY: Polyunsaturated fatty acid biosynthesis.

CC -- SUBCELLULAR LOCATION: Endoplasmic retriculum.

CC -- DOMAIN: The histidine box domains may contain the active site and/or be involved in metal ion binding.

CC -- SIMILARITY: Belongs to the fatty acid desaturase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Query Match

PATHWAY: Polyunsaturated fatty acid biosynthesis.
SUBCELLULAR LOCATION: Endoplasmic reticulum.

DOMAIN: The histidine box domains may contain the active and/or be involved in metal ion binding.

SIMILARITY: Belongs to the fatty acid desaturase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                s SWISS-PROT entry is copyright.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ARATH
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         SEQUENCE
the second double bond in the biosynthesis of 18:3 fatt important constituents of plant membranes. It is thought cytochrome b5 as an electron donor and to act on fatty esterified to phosphatidylcholine and, possibly other phospholipids.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     361

SIMILARITY: Belongs to the fatty acid desaturase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          PATHMAY: Polyunsaturated fatty acid biosynthesis. SUBCELLULAR LOCATION: Endoplasmic reticulum. DOMAIN: The histidine box domains may contain the active and/or be involved in metal ion binding.
                                                                                                                                                           356

-!- TISSUE SPECIFICITY: Strongly expressed in developing see
-!- DOMAIN: The histidine box domains may contain the active and/or be involved in metal ion binding.
-!- SIMILARITY: Belongs to the fatty acid desaturase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           (EC 1.14.19.-).

It is thought to use cytochrome b5 as an electron donor and to act on fatty acids esterified to phosphatidylcholine and, possibly, other phospholinia.
